

INTERGALACTIC OFFICERS OF EVIL EPK
- A SCIFI ORTIENED BAND -

The Concept

This band is based on the sci-fi STAR TREK and delivers not only a sci-fi band theme but also follows a stylistic concept of sci-fi lyrics and music, using synthesizers and electronic punk with guitars.

Other facts:

- Science Fiction societies exist since the late 1930's, there are sci-fi conventions annually
- Science Fiction includes the following shows: Star Trek, Star Wars, Stargate, Battlestar Galactica, Doctor Who, Stranger Things, etc. - wide range of listeners / fanboys / trekkies
- The domestic total gross for a Star Trek movie made **\$257,730,019** in the box office.

This idea was done by one remix artist and got him 4.6M views.

He only made this one song with a sci-fi theme and sampled voices, the concept of a fully original sci-fi themed band has not been done in the UK. The video was made in his living room and a green screen.

There are 2 bands in the US that have a sci-fi theme, but nothing with synthesisers. Warp 11 and 5 Year Mission.

What do other people think of the idea?

People just love the idea of a star trek band performing on stage in costumes. Especially music filled with sci-fi FX, nerdy lyrics and quotes from their favourite TV series. A projector for live gigs is also considered showing 8-bit pixel artwork of IOE to make the live show and unforgettable experience and stand out from the rest of the performers.

When is the next EP
going to be released?
